(54) COLOR CONVERSION MEMBER AND EL DISPLAY USING IT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a color conversion member in which deterioration of color conversion function and external light reflection are prevented, and color rendering property is enhanced.

SOLUTION: This member is constituted of a transparent substrate, the color conversion layer, and a color filter layer. The color conversion layer converts an incident light of every pixel into an outgoing light of a different color from that of the incident light, the color conversion layers of two kinds or more are arranged on the transparent substrate, and the color filter layer is formed between the transparent substrate side of either of color conversion layers or other adjacent color conversion layers to make color conversion.
